

# NICE - Investigate

## Digital Evidence Management for Businesses

“Your CCTV security cameras can help deter and rapidly solve crime. Register them with your local Police force, to streamline information exchange and empower the Police with the evidence needed to catch criminals faster and make your businesses and community safer.”

### What is DEMS and NICE Investigate

NICE Investigate is a Digital Evidence Management Solution (DEMS) software tool that automates the entire digital investigation and evidence management by helping police investigators close more cases, faster. The DEMS platform electronically shares the information - via the internet - to improve collaboration with the police, businesses and the CPS, allowing more cases to be successfully solved and prosecuted.

#### How This Helps the Police

NICE Investigate automates and speeds up the entire evidence collection, discovery, analysis, management, notification and sharing process.

It improves productivity by eliminating manual, time consuming evidence collection and analysis activities, ultimately helping investigators close more cases faster.

Investigators can now spend less time gathering and organising evidence, checking and rechecking to ensure they have everything and have more time for investigating.

#### How This Helps Businesses

Currently a high number of business crimes go unreported due to the protracted nature of reporting and sharing securely the related (often CCTV) evidence.

The NICE Investigate solution addresses this issue by allowing businesses to, voluntarily, pre-register their cameras, via the 'Business Portal', to their local police force.

This FREE service means that in the event of an incident the business can simply report, and then send, the relevant footage via email directly to their police force - within seconds.

### Why Businesses are Using NICE Investigate

The solution dramatically improves crime investigation processes and outcomes:

- Pre-Registered cameras - via the Business Portal - mean instant and easy sharing of CCTV footage to report an incident
- Camera Registration, Reporting a Crime and Sharing of Multimedia (CCTV, Images) is quick and easy
- Reduced risk of evidence being “lost” in the post or misplaced
- No disruption to the business or to staff by having to wait after hours to burn data to discs
- Helps make the local community a safer place for your business and members of the public
- Information is kept safe and secure; never made public
- Participation is FREE and always remains 100% voluntary

*“We are the first, but I am sure we will not be the last as more retailers and police forces come on stream – to me it’s a no-brainer.”*

**Iona Blake - Security and Incident Manager, Boots UK.**
